Best Practice- II

1. Title of the Practice: Green Campus- Healthy Campus

2. Goal:

To keep the Campus green and clean

To grow more trees with variety

To help biodiversity conservation

To reduce the traffic noise

To inculcate aesthetic values and eco-consciousness among the students and staff of our institution

To create good ambience for the holistic development of the students.

To improve the overall health of the people on campus

To support and implement "Swachh Bharat Abhiyan" for healthy India

To use Led Light

3. The Contexts:

P.S.G.V.P. Mandal's College of Pharmacy, Shahada situated in the lap of Satpuda mountain range. Satpuda forest is one of hotspot for floral and faunal biodiversity. Our institution is committed to maintain the health and biodiversity of the campus that eventually protect our environment. Campus expansion has resulted in an increase in the use of motor vehicles and resource consumption. Therefore, the college has felt the need to maintain and enhance the greenery in the campus.

4 The Practice:

We plant various types of saplings with the help of students, Teaching and nonteaching staff of the college. These plants are made available from the nearby government and private nurseries mostly at the onset of monsoon every year and otherwise. These are successfully maintained by providing fertilizers and irrigation facility. We conduct the program by Green Army volunteers for the maintenance of our campus. The faculty members celebrate their birthdays not by cutting a cake but by planting a sapling. This cake free initiative under this best practice has proved very fruitful so far more than hundred trees have been planted by the faculty members alone. The sapling planted by the faculty members on his/her birthday has to be taken care of by the concern faculty members including iron meshing and watering. Following are the major activities conducted to achieve the goal of green and healthy campus The college has conducted green audit of the campus Right from the beginning the college has carried out labelling of plants on the college campus which helps students to understand the botanical names and specifications of the plants. College has maintain Medicinal Garden, with labelling

Signboards/posters are displayed on the college campus for encouraging ideas of plastic-free campus, noise pollution, and environmental awareness. The energy audit of consumption of electricity in the college is conducted recently by certified external auditor. LED bulbs are installed in the college buildings to save electricity. The college has robust rain water harvesting mechanism that has resulted in the increase in groundwater levels of borewells on the campus. The chemistry laboratory uses rain water as distilled water for practical.

5 Evidence of the Success:

Our campus is spread across 3 Acres of sprawling green campus. This practice has resulted in the improved quality of air and subsequently quality of life. The tall trees helped reduce the noise created by street and traffic sounds as the college campus is adjacent to the national highway. It is a proven fact that the plant barriers can be a solution to noise. Indeed, plant barriers are excellent solution for the traffic noise.

6. Problem encountered and Resources Required:

No serious problems were faced as such but during the initial phase it was difficult to find the alternative for single use plastic carry bags for the students.
